

Waste Management Solutions

We provide integrated waste management and tank cleaning services to the oil and gas industry worldwide. We utilize the latest technology and innovative solutions Waste Management of a wide range of waste including drill cuttings. We minimize the risks associated with waste management for its clients.

We are capable of adapting a wide range of techniques and equipment to create cost-effective, efficient and safe solutions to tank cleaning problems.

We offer quality service at a competitive price. In today's globally competitive environment, this mission statement applies more than ever. Our customers require service they can depend on.

Our personnel have the expertise and state of the art equipment for cleaning any type of tank including crude oil, fuel, gas and chemical tanks. Our personnel are trained to handle and work in all types of environments such as normal and inert atmosphere.

Mission

To build a better world by offering solutions that help to enhance the urban environment.

Vision

A clean and green self-sustaining natural environment in modern cities.

CORE VALUES

- ✦ We are a team - in success & in failure
- ✦ Adapting successfully to every market
- ✦ Giving back to the community
- ✦ Limitless passion for what we do
- ✦ Empowering every team member to strive hard & achieve
- ✦ Integrity in everything & in every way

Why US

- ✦ Provide complete waste management solutions
- ✦ Efficiency, professionalism and a total commitment to safety
- ✦ Best services at the lowest long-term cost
- ✦ Avoid and rectify issues causing environmental degradation

OUR SERVICES

we offer businesses a safe solution for the collection and disposal of all types of generated waste. The service includes an initial site visit by our experts to understand the requirements, measurement and recording of each collection at regular intervals and report generation on collection times, waste type, volumes and environmental impact.

- A) Hazardous Waste Collection and Disposal.
- B) Non-Hazardous Waste Collection and Disposal.
- C) Tank Cleaning & Maintenance.
- D) Industrial Cleaning Services.
- E) Onshore and Offshore Oil and Gas fields Waste Services.
- F) Municipal Collection & Cleaning.
- G) Recycling Services.
- H) General Maintenance.

A) Hazardous Waste

- We have the proven ability to provide the following hazardous liquid waste treatment services at ISO standards: acid waste, caustic waste, contaminated storm water, grease trap waste, oily water and sludge, septic waste, solvents and trade waste.
- Vertical integration of contaminated and hazardous chemical waste means that we provide a comprehensive solution to safely pack, transfer, treat and store dangerous waste in a manner that complies with local regulations.
- Our experts can provide specialist advice to effectively manage your risk on site regarding volumes, types of waste and approved treatment methods.
- We also provide a range of bio-solids management consulting services for local authorities, councils and private wastewater treatment operators.

B) Non-Hazardous Waste (Collection & Transportation & Disposal)

we provide safe collection of all kinds of non-hazardous solid waste using state-of-the-art vehicles like Refuse Compactor, Skip Loader and Hooks Loader. We own the largest fleet of specialized liquid waste collection vehicles. our tankers capacity starts from 700 to 10,000 gallons to transport sewage and contaminated wastewater. We have specialized vehicles for sandy work with high quality services.

C) Tank Cleaning & Maintenance

- We are leading expertise in tank cleaning and maintenance of all types of tanks: large and small tanks; above ground tanks (ASTs) and underground tanks (USTs); crude, chemical, fuel, water, and solvent tanks. Our vacuum-cleaning techniques ensure the removal of all water, sludge, rust and other pollutants from tanks. After which our trained operators utilize safe and highly effective HP water jetting to remove residual deposits in larger tanks, and in smaller tanks we use automatic tank cleaning heads to as to minimize man-entry.
- Our tank specialists are trained in confined space entry and carry out work inside tanks wearing full protective clothing and breathing apparatus. Where necessary we can use cold cutting techniques to access enclosed tanks.
- With effective cleaning techniques and a wide range of repair services available, we can support you with all of your tank maintenance needs.

Tank cleaning services include:

- Cleaning of offshore tanks on supply motor vessels and oil rigs;
- Cleaning of onshore tanks (oil storage tanks, drilling fluid, chemical fluid tanks etc.);
- Cleaning of various types of containers (DCB, LDCB, tote tanks, road tankers, skips etc.);
- Tank bottom residues uplift and transfer and final disposal of residual product;
- Tank drainage and disposal of tank bottoms and sludge;
- Cleaning and purging of pipe work;
- Manual fuel tank cleaning;
- Remote tank cleaning using mechanical high-pressure washers;
- Testing and gas free certification;
- Removal of tanks using hot and cold specialist cutting equipment.

D) Industrial Cleaning Services

We have professional and modern recent machine for cleaning service of manufacturing/fabricate and industrial clean up services. Contracts are totally different for manufacturing and industrial cleaning than commercial/trade cleaning services. We provide customized cleaning timetable and services to indicate a site-specific difference, your goals, and your budget. we provide overall cleaning problems solution for manufacturing and industrial business.

we provide several types of industrial and commercial cleaning services to maintain septic tanks, grease traps and oil separators, ship tanks, storm water channels, lift stations for sewage, and others.

OUR SCOPE OF WORKS: -

- Chemical cleaning service for industrial and Manufacturers units.
- Cleaning service for Steel and Iron factories & Regular cleaning service for production areas
- High pressure washing or cleaning
- Industrial floor stripping, scrubbing and buffing service
- Cleaning service for industrial equipment
- Confined space and water tank cleaning
- Warehouse cleaning & Steel yard and storage areas
- Chemical Cleaning
- Air / Steam Blowing & Foam Cleaning & Oil Flushing & Hydro Jetting & Decoking & Pigging
- Cold Cutting & Line Cleaning & Columns & Vessels
- Cooling Water Cleaning & Pressure Testing & Emergency Cleaning Service.

E) Onshore and Offshore Oil & Gas fields Waste Services

We are the leading provider of waste management and industrial cleaning services for the oil and gas industry in the UAE. we have successfully delivered services to this sector for over 15 years, maintaining the highest levels of safety and service reliability.

1) Human-Derived Wastes

Human-derived wastes are associated with basic human activities on offshore facilities and include: Sanitary wastes, Domestic wastes (kitchen wastes, laundry wastes, and sink and shower drainage), and Trash.

2) Drilling Wastes

The wastes most commonly associated with offshore E&P activities include Drilling fluids, Drill cuttings, produced water, Treatment, workover, and completion fluids, Deck drainage, produced sand, naturally occurring radioactive materials (NORM), Hydrostatic test water, and - Other assorted wastes.

3) Other Industrial Wastes

A variety of wastes that are not specific to the offshore oil and gas industry are also generated at offshore facilities. These same wastes could be found at numerous other industrial facilities. They include, for example: -Scrap metal, Wood pallets, Cardboard, Empty drums, Used chemicals and paint, Sandblasting grit and paint, and Cooling water.

F) Municipal Collection & Cleaning

we are responsible for the collection and cleansing of municipal waste across several regions of the UAE. The division provides street sweeping, cleaning, waste management and collection, and beautification services for the maintenance of pavements and public areas, as well as a state-of-the-art collection service for the safe and responsible disposal of waste in residential areas.

G) Recycling Services

Our Recycling Services aim to manage an organization's waste sustainably and efficiently. We collect recyclables by either placing bins, 3-stream recyclers or blue single-stream totes for client site. To help implement the program competently, we also provide training sessions, which introduce the 3 R's (Reduce, Re-use, Recycle) and help encourage green practices at client site.
